

A great choice for caravans, RVs, boats and tiny homes

The Ecolet™ Separera Mini is a self-contained composting toilet with a slim and compact design. The high gloss, porcelain-look gives this loo an appearance that will fit into any style of bathroom, without the heavy weight of the porcelain.

Easy Installation

Sustainable

Odourless

Convenient Chamber Screen

Urine Container

With the Container model, the urine is drained into an internal liquids tank.

Urine Extraction

With the Extraction model, the urine is drained away to an external location such as a liquids tank or an absorption trench.

Specifications

Dimensions	500 x 400 x 500 mm
Volume	Solids chamber: 2x 15L Liquids chamber (Extraction model): 8L
Capacity	Up to 2 people
Chamber Screen	Yes
Power	12V Built-in Fan
Material	Recyclable high-gloss polypropylene
Approx. Emptying Interval 2 Users	Solids: 1-2 weeks Liquids: Every other day or when full
Starter Pack	- Compostable bags 125ml Nature Flush enzymes with spray bottle
Incl. Vent Piping	Yes

Urine can be emptied into another toilet or at a dump point, or diluted and used as a fertiliser.

Solid waste could either go directly into the solids chamber or into a bio bag to be easily removed and disposed of.

Depending on environmental conditions, waste needs around 3-6 months to compost.

If you're interested in turning waste from your self-contained toilet into a fertiliser, we recommend emptying the solids chamber into an external chamber to set aside and finish composting.

FREQUENTLY ASKED QUESTIONS

How does a Mini toilet work?

Mini toilets separate solid and liquid waste so that there is no anaerobic bacteria activity which produces the unpleasant odours. The separate chambers can be quickly and easily removed to dispose of the waste.

Do Mini toilets smell?

When properly maintained, Mini toilets do not smell. They often include a ventilation system to remove odours and promote aerobic decomposition.

How often do you need to empty a Mini toilet?

The frequency of emptying depends on usage. For full-time RV living, the solid waste compartment may need to be emptied every few weeks to a few months. Liquid waste tanks usually need to be emptied every few days.

What maintenance is required?

Regular maintenance includes:

- Emptying the liquid waste tank
- Adding bulking material (like wood shavings or hemp bedding) to the solid waste chamber
- Cleaning the toilet with a natural enzyme cleaner as needed

Can toilet paper be used in a Mini toilet?

Yes, toilet paper can be used in a Mini toilet. However, it is recommended to use recycled toilet paper to aid the composting process.

How do you handle the solid waste?

Solid waste should be disposed of according to local regulations. This usually includes emptying it at a dump point or into a separate chamber where it can finish composting and later be used as fertiliser.

How do you handle the liquid waste?

Liquid waste can be disposed of at a dump point or in a toilet. It could also be diluted and used as a fertiliser for non-potable plants.

Is it difficult to install a Mini toilet in an RV?

The Mini toilet is designed for easy installation with minimal modifications to the RV.

Are Mini toilets legal in all areas?

Regulations can vary by location. It's important to check local laws and regulations regarding the use and disposal of Mini toilet waste.

What are the benefits of using a Mini toilet in an RV?

- Environmentally friendly
- Easy to install, operate and maintain
- Can be more cost-effective over time

What should not be put into a Mini toilet?

Avoid putting non-compostable items such as plastics, chemicals, or non-biodegradable products into the toilet. These can harm the system.

Can a Mini toilet freeze in cold weather?

Yes, like any other system, Mini toilets can freeze in cold weather. Insulating the toilet or keeping the RV heated can help prevent freezing.

Do you need a special type of RV to use a Mini toilet?

No, any RV can potentially use a Mini toilet, though some modifications might be necessary depending on the RV's layout and plumbing.
