Step-By-Step Instructions

Warning:

Safety First: Always use correct safety equipment.

This towbar is NOT to be drilled, cut, welded or modified in any way.

Check the surrounding area before drilling into chassis or body panels for fuel lines, wiring harnesses and other components that may be a hazard.

General:

Before fitting this towbar read fitting instructions and check installation hardware is correct.

Check that the towbar is suitable for the vehicle and be wary of any changes to the vehicle design that may conflict with the fitting of this towbar.

After drilling, blow any filings clear, remove any swarf and treat exposed metal with a rust inhibitor.

If this vehicle requires a bumper cut out, please check to make sure that you measure twice and check twice before cutting any panels as some bumper profiles can change.

If you are not sure, then ask your towbar supplier.

Tighten all bolts as specified on the last page.

1. Remove all bolts and brackets from towbar, taking note of locations and assembly.
2. Assistance required for initial installation.
3. Place brackets into chassis and line up with correct holes.
4. Fit towbar onto vehicle securing through sides with ½ inch bolts, nuts and washers. Very forward hole will have nut welded to bracket.
5. Install bolts, nuts and washers through bottom of chassis where required.
6. Tighten all bolts to specified ratings.
7. Fit ball mount with pin and clip provided.
8. Attach ratings sticker to driver's side door.
