

PRODUCT INFO

DOMETIC GLO-A400 MULTI-USE AREA LIGHT 8 COLOURS

Dometic's Area Light provides lighting options for every outdoor lighting need. Use it as a torch; hang it by the handle for an area light; or slide on the lantern diffuser for softer, wider lighting. Our 400-lumen light is water resistant, durable, and with a battery that allows the light to operate for up to 8 hours on the highest setting. Offering 4 brightness settings and charges in approximately 6 hours; its battery level indicator lets you know whether it needs to be charged. No need to stick with just white light; choose from eight different colours to illuminate your campsite. Choose the amber colour that doesn't attract insects to help keep your campground bug-free. Bluetooth enabled for easy control via an app.
