Bulk kits of individual items available:

- Ciga Socket
- Engel Socket
- Merit Socket
- Single surface mount housing
- Double Surface mount Housing
- Flush Mount Kits

You can also find our sockets in our versatile panel range

That 12v cigarette dash outlet in your 4WD isn't going to be enough to power up your phone, tablet and GPS you're on the road.

It definitely won't keep your power-hungry fridge running reliably enough to ensure you have icy cold bevies to enjoy at the end of a hard days' adventuring. Let's face it, if you've only got that dash outlet, you'll just need to cut back on the 12v appliances you take on your travels.

But there is a solution! Sleek, affordable and pre-wired so they're virtually foolproof to self-install, Baintech's GU Panels let you charge and power multiple 12v appliances when you take off on your 4WD adventure - so you don't have to leave any of them at home!

With a strong commitment to complete customer care, Bainbridge Technologies' expert power system solutions are all backed with 2 years warranty and an expert in-house service team to help with any after sales service support.

Visit our website to find out more about power systems, watch our informative YouTube videos and see our full catalogue.

**BEWARE OF
