

3600 STARTING WATTS
3200 RUNNING WATTS

DEWALT

Introducing the new DeWalt 3600E Inverter Generator.

- SENSITIVE ELECTRONIC EQUIPMENT
- OUTDOOR LEISURE
- DOMESTIC
- CARPENTRY
- LIGHT TRADES

The DeWalt DXIG3600E Petrol Powered Inverter Generator with 3600 starting watts and 3200 running is for medium duty trade applications where sensitive electronics are used.

It comes packed with market leading innovation such as colour LED fuel and power usage gauges for monitoring your generators demands and has the convenience of electric start.

Its generous 9L fuel tank means you get large run time performance and its inbuilt handle and wheels make it convenient to move around.

SPECIFICATIONS

Description	3.6kVA (Power Factor 1.0)
Watts	3,600W Start up and 3,200W Running
Outlets	2 x 240V 15A / 12V DC with Dual Port USB adapter
Engine Size	DeWalt 121cc OHV engine with low oil shutdown protection
Starting	Electric start with lithium battery for easy reliable starts
Fuel	Large 9L fuel tank delivers up to 8 hrs runtime @ 50% load
Displays	Easy to read colour LED display shows fuel & power usage levels
Noise	Ultra quiet low tone muffler design
Alternator	100% Quality copper windings for best performance
Weight	43kg dry weight for with fold out handles for easy transport
