Hoppt Edging Concrete Trowel

TOL60G/TOL75G

24/30" Edging Trowel Machine

The Edging Trowel is designed for finishing right up to the edges of walls, protruding pipes and columns. Helps to minimize the need for manual edge work and improves the ergonomics for site workers.

Features and Benefits

- The cast alloy free rotating ring with rubber protector allows the machine to run up to the edges without damage.
- Precision engineered gearbox to transfer maximum torque to the trowel rotor
- High strength foldable handle for easy storage without compromising comfort and control
- Easy access to pitch and engine controls
- Available in 24" & 30" models

Specifications	TOL60G	TOL75G
Dimension - LxWxH (mm)	1,510x630x1100	1,520x750x990
Guard Ring Diameter (mm)	630	750
Operating Weight (kg)	56	64
Handle Type	Foldable (Half fold) Dimension: 700 x 630 x 700	
Finishing Blade Size (mm)	230X120	270x120
Max. Blade Pitch Angle (°)	15	
Blade Operating Speed (rpm)	85-135	
Engine Options	Honda GX160 @ 3.6kW (4.8hp) 4-Stroke Petrol
