

# TDR11079 TOUCH SWITCH PANEL

## Installation & Wiring Instructions

1. Mount circuit control box securely and connect to power and accessories as per wiring diagram. Ensure accessories and control box share a common earth.
2. Cut a 20mm x 50mm hole in the desired location for the switch panel and feed the VGA cable through the control box.
3. Secure the VGA cable to the rear of the switch panel and the circuit box.
4. Mount the switch panel using the supplied 3M double sided adhesive tape
