THE THIRSTY NOMAD CARAVAN WATER PURIFIER

For the first time in Australia, The Thirsty Nomad brings affordable water purification to the caravan sector. Based scientific evidence and the latest in water purification technologies to Australian caravanners, requiring no power and no chemicals.

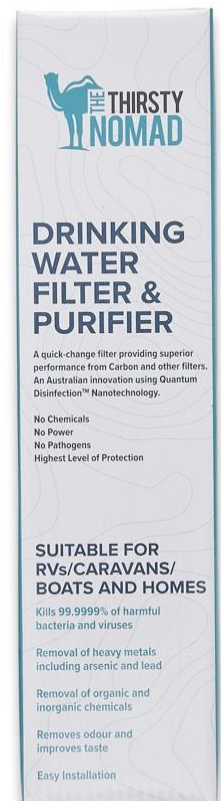

For too long RV owners have had little choice other than simple granular activated carbon filters, which cannot kill bacteria and viruses upon contact and do not meet Australian Drinking Water Standards for E.Coli. The Thirsty Nomad “5 in 1” water purifier has been designed and developed by Water Scientists, rigorously tested and scientifically proven. Because when entrusting a filter with your safe water needs, and your health on the road, you need to know your filter is tested and proven with scientific data to support these claims. The Thirsty Nomad “5 in 1” purifier is the most affordable, compact, advanced purifier on the market today.

With many outstanding features this purifier is a game changer. For the first time in the Australian RV sector, 0.01 micron Ultrafiltration and ANSI/NSF P231 certified Quantum Disinfection media combine to kill harmful bacteria and viruses in 0.1/second. Backed by 14 global laboratories and 7 global patents.

Offering caravanners a 5-stage water treatment unit in one light, compact, durable purification unit which can be used to either fill tanks or installed permanently at the point of use – ideally in the van, after the pump.

FEATURES

- 5 Stage water treatment system to purify water
- Removes 10 heavy metals inc. Lead, Fluoride, Arsenic III and Arsenic V
- A Grade NSF Certified, 5 micron Carbon Fibre Block (CFB)
- CFB has up to 20 X higher contaminant removal than granular carbon
- Compact at just 29cm long x 16cm circumference
- Lightweight at just 590 grams
- Comes complete with white mounting clips, brass ends, a Push Fitting Kit (inc. 2 x 12mm & 2 x 1/4”)
- Long lasting at 7,500 litres (pending water quality)
- Backed by independent scientific evidence
- 99.9% of bacteria blocked from bacterial colonisation of carbon
- 0.01micron Ultrafiltration
- Quantum Disinfection™ kills 99.9999% of bacteria & viruses upon contact
- Meets Australian Drinking Water Guidelines for E-Coli
- Tested to AS/NZS Standard 4276.7 Water Microbiology
- 12 Month Australia-wide Warranty

SPECIFICATIONS

FLOW RATE	@60PSI 6 – 8 Litre/minute @55psi 4 litres per minute
OPERATING TEMPERATURES	-5°c – 50°c
LONGEVITY	7,500 Litres (pending water quality)
WEIGHT	590 grams
SIZE	29 cm long x 16cm circumference
MICRON RATING	0.01 Micron
DISINFECTION RATING	99.9999%
ANSI/NSF CERTIFICATIONS* All laboratory tests on website	ANSI/NSF 61 ANSI/NSF 42 ANSI/NSF Protocol 231
CARBON FIBRE BLOCK	100% Biodegradable coconut shell with heavy metal resin treatment
CHLORINE REMOVAL CAPACITY* All laboratory tests on website	0 - 2000 litres 100% 2000 – 4000 litres 96% 4000 – 6000 litres 92%

For Permanent Installation, the Thirsty Nomad comes complete with above **Push Fitting Pack INCLUDED**;

- ½” BSP lead free brass fittings
- 12mm straight and 12mm Elbow
- ¼” straight and ¼” Elbow
- 2 x White Mounting Clips

Standard hose connections for Tank Fill option
