

TOW SECURE BREAK-AWAY KIT

A 'break-away' system is compulsory on all trailers over 2,000kg GTM. Each state/territory has their own rules regarding their towing legalities. For example, all trailers registered in NSW are required to have a brake battery monitor fitted. This brake battery monitor needs to be visible from the driver's seat. Coast recommends contacting your local roads and traffic authority regarding your state's towing legalities.

FEATURES

- Automatically applies the trailer brakes and the trailer stop lights in the unlikely event that the trailer separates from the tow vehicle.
- Kit Includes: Control Module, Wireless Receiver, Switch and Charger.
- Automatically performs a self test every time the tow vehicle's engine is started.
- Whilst towing, an automatic battery test is performed every 30 minutes.
- Features LED lights and audible sounds as alerts and can be paired with more than one Wireless Receiver.

TOW SECURE TS2000 BREAKAWAY CONTROL + HARNESS WITH TEKONSHA SWITCH

350-01406

The TS2000 uses the battery in your RV as its source of energy storage meaning that without an internal battery it is nice and compact. It features a 5m wiring harness to connect to the RVs battery which it will not draw power from while on standby.

It has a wireless receiver which is housed on the dash so that the driver can monitor the battery status via LED and audible alarms. The control module performs a 'self-test' every time the tow vehicles' engine is started to ensure everything is operable and whilst towing. The control module can be paired with multiple wireless receivers – this may be required if the same trailer is towed by different vehicles.

- Reduced size thanks to no internal battery
- No power draw while on standby
- 5m Wiring Harness
- Power indicating LED

TOW SECURE TS1500 BREAKAWAY CONTROL + HARNESS WITH TEKONSHA SWITCH

350-01408

The Tow Secure TS1500 automatically applies the trailer brakes and the trailer stop lights in the event that the trailer separates from the tow vehicle.

The direct replacement for the TS1000, the TS1500 has updated electronics so that there is no draw on the internal 12v battery while on standby. This model is ideally suited for trailers that don't typically have an onboard battery such as dog trailers, box trailers and horse floats.
