	440	533.3	666.7	874.8
Noise Level at 7 meters (dBA)			72.6	

Notes:

- 1) Ambient reference conditions: 1,000 mbar, 27°C, 30% relative humidity;
- 2) Standby Power: the maximum power available under varying loads. Only for standby and emergency use. No overload is permissible. Prime Power: the maximum power available under varying loads for continuous operation. A 10% overload is permissible for 1 hour every 12 hours.

Features	Benefits
<ul style="list-style-type: none"> I Excellent cooling system, reliable operation under harshest conditions. I PLC-5220 control panel with AMF function. I With sound attenuated enclosures available with high protection against water and dust. I Designed with safety in mind earth leakage protection. I Leroy Somer Alternator, IP 23 class 'H' insulation. I Equipped with a ladder (for generators 300-500 kVA),exterior fueling point,water tank inlet. 	<ul style="list-style-type: none"> I Function stability credibility, service convenience. I Low operating cost results in optimal economy. I Gets the job done wherever you are. I Ease of installation, operation, and maintenance.

Control System

PLC-702

DSE-702 key manual start module is a manual engine control module designed to control the engine via a key switch and push buttons on the front panel. The module is used to start and stop the engine and indicate fault conditions, automatically shutting down the engine and giving a true first up fault condition of an engine failure.

Standard Control Function

- Manual Engine Control Module
- Low Oil Pressure
- High Engine Temperature
- Auxiliary Shutdown
- Overspeed Protection
- Protection hold-off timer
- Charge Failure warning

PLC-5220

DSE-5220 control panel is applied

- | Microprocessor control, with high stability and credibility
- | Mains supply and generator operation monitoring
- | Indicating operation status and fault conditions
- | Multiple protections; multiple parameters display, like pressure, temp.
- | Manual and automatic work mode selectable
- | Real time clock for time and date display, overall runtime display, 99 log entries
- | Overall power output display
- | Integral speed/frequency detecting, telling status of start, rated operation, overspeed
- | Communication with PC via RS485 OR RS232 interface, using MODBUS protocol.
