

BM PRO RVVIEW2

POWERING YOUR ADVENTURES

The RVView2 is a wall-mounted battery monitor designed specifically to operate with BM PRO's BatteryPlus35.

The RVView2 provides vital data at a glance including caravan battery voltage and charging/discharging current.

The RVView2 also provides an indication of the battery's remaining charge capacity.

In addition to battery monitoring, the RVView2 enables monitoring of water levels of up to four water tanks from a sleek, wall mounted display.

The RVView2 can be connected to the OdysseyLink103* to become a part of the Odyssey system. OdysseyLink103 enables SmartConnect Bluetooth sensors and the use of a free Odyssey App to remotely monitor the battery and control caravan's water pumps from the mobile phone.

SPECIFICATIONS

Input Voltage Range	6V to 16V
Monitored Battery Capacity	50Ah to 600Ah
Visual Warning	BatteryPlus35 short-circuit
Water Tank Monitoring	Dipper or Tank Bungs
Battery Drain	< 22 mA
Ambient Temperature	0°C to 50°C
Dimensions	140W x 80H x 15.5D

KEY FEATURES

ODYSSEY

Monitor:

- battery voltage and charge status,
- battery charging & discharging currents,
- Auxiliary and solar charging currents,
- Level indication of up to 4 water tanks
- Battery on/off status

Separate water tank screen

Function to disconnect the battery from the load

When used with the OdysseyLink103, enables SmartConnect and free Odyssey app

SMARTCONNECT
