# WATER MASTER PUMP RANGE

## WATER TRANSFER PUMPS

When portability is important, Water Master's light-weight water transfer pumps are the answer. Built to be moved and weighing as little as 6.2kg, these pumps are ideal for transferring high volumes of water at relatively low pressures. Flood irrigation, construction site dewatering and fast fill tanker applications are typical uses. Our Water Transfer Pumps are available with your choice of either a Honda, Yamaha, Lister or Yanmar engine in either Petrol or Diesel. Offering 1" to 4" suction, with heads of up to 33 metres and flows up to 1420 litres per minute.

## HIGH PRESSURE FIRE PUMPS

Water Master High Pressure Firefighting Pumps feature high pressure, high flow characteristics. Suitable for firefighting, water transfer, high head dewatering, construction site dust suppression and fast fill tanker applications. Our new and improved 1.5" and 3" Honda, Yamaha or Yanmar powered firefighting pumps are built tough to handle Australian conditions, with an electric start option now available in the 3" pumps. Standard in a rollover frame and weighing from only 24kg, these pumps are built to handle the toughest conditions with easy manoeuvrability and are available in either Petrol or Diesel. Also available are fire hose pump kits to suit the 1.5" models. These come with one suction hose and the option of either one or two delivery hose(s).

## TRASH PUMPS

Water Master Trash Pumps offer rapid self priming capabilities. They have been designed to transfer high volumes of contaminated water through big, single closed style impellers that are capable of handling small solids up to 28mm. The petrol powered portable pumps models are available in 3" to 4" suction options, with heads up to 30 metres and flows up to 2000 litres per minute. These units are powered by Honda engines, so you know you will get the reliability and power you can trust.

## CHEMICAL TRANSFER PUMPS

Water Master Chemical Transfer Pumps feature high flow characteristics and deliver superb fuel efficient performance with the help of durable polyethylene terephthalate impellers and internal casings. Suitable for chemical transfer and waste water handling applications. Available in 2" suction with heads to 23 metres and flows up to 300 litres per minute.

## SPARE PARTS & ACCESSORIES

Water Master offers a full range of pump parts and accessories. These can be ordered at any one of our Water Master dealers, Australia-Wide. Engine parts are available through the engine manufacturer.

Small & Large Dust Covers

Hose Kit for 1.5" Fire Pumps

Seals & Gaskets

Impeller

# Water Master Pump Products is an Australian brand specialising in tough pumps for tough Australian conditions.

Renowned for our quality and reliability, delivering high quality pumps for applications such as firefighting, irrigation, water transfer, trash and chemical removal, these versatile pumps can be used in various environments ranging from the home to industrial, building and rural sites. Offering petrol and diesel powered pumps ranging from 1" up to 6" inlet/outlet, you can't pass these up for efficiency, reliability and performance.

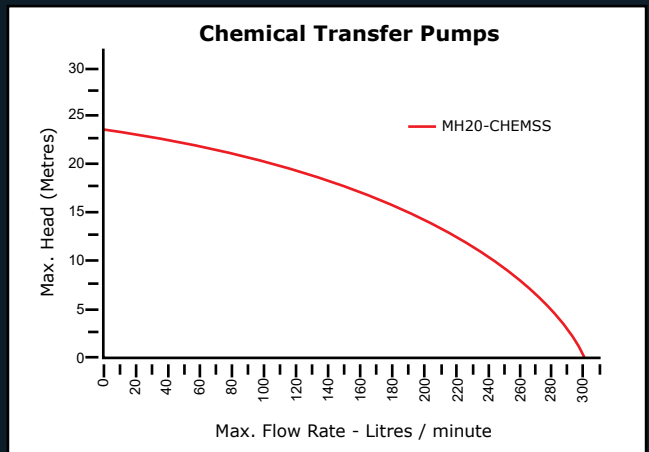

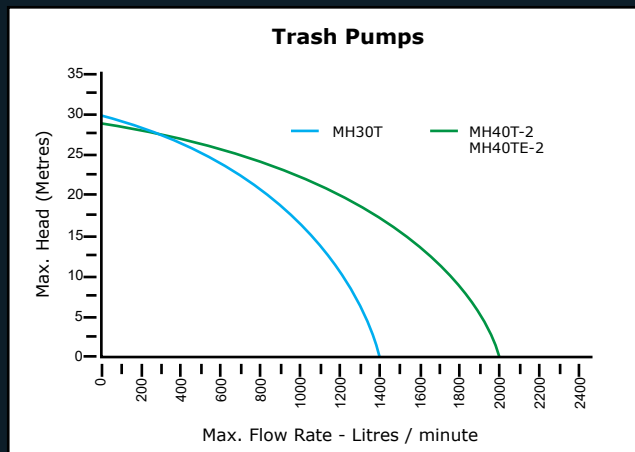

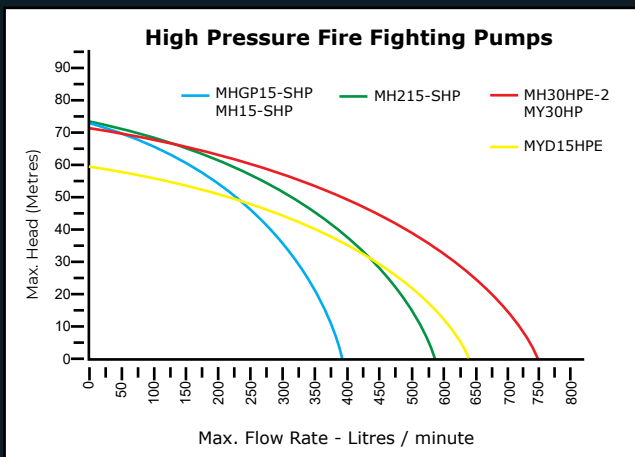

Powered by names you can trust such as Honda, Yamaha, Lister Petter and Yanmar, so these units won't let you down. All pumps come with a rollover frame provided as standard\*, offering extra protection and easier transportation for when you need to move water quickly and safely.

*\* Excludes MH10-2 model*

We offer parts and service Australia wide, with the support of a growing network of dealers across the nation. Full manufacturer's 12 month warranty on frames and pump components. Engine warranty (including any engine parts) is covered by the engine manufacturer directly.
