INNOVATIVE DESIGN & PROTOTYPE TESTING are key components of Generac's success in “IMPROVING POWER BY DESIGN.” But it doesn’t stop there. Total commitment to component testing, reliability testing, environmental testing, destruction and life testing, allows you to choose Generac with the confidence that these systems will provide superior performance.

TEST CRITERIA:
✓ PROTOTYPE TESTED
✓ MOTOR STARTING ABILITY
✓ SYSTEM TORSIONAL TESTED
## 8/10/13 kVA features and benefits

### Engine
- **Generac (OHVI) design**
  - Maximizes engine “breathing” for increased fuel efficiency. Plateau honed cylinder walls and plasma moly rings help the engine run cooler, reducing oil consumption resulting in longer engine life.
- **“Spiny-lok” cast iron cylinder walls**
  - Rigid construction and added durability provide long engine life.
- **Electronic ignition/spark advance**
  - These features combine to assure smooth, quick starting every time.
- **Full pressure lubrication system**
  - Pressurized lubrication to all vital bearings means better performance, less maintenance and longer engine life. Now featuring up to a 2 year/200 hour oil change interval.
- **Low oil pressure shutdown system**
  - Shutdown protection prevents catastrophic engine damage due to low oil.
- **High temperature shutdown**
  - Prevents damage due to overheating.

### Generator
- **Revolving field**
  - Allows for a smaller, light weight unit that operates 25% more efficiently than a revolving armature generator.
- **Skewed stator**
  - Produces a smooth output waveform for compatibility with electronic equipment.
- **Displaced phase excitation**
  - Maximizes motor starting capability.
- **True Power Technology**
  - Less than 5% total harmonic distortion (THD)
- **Automatic voltage regulation**
  - Regulates the output voltage to ±1% prevents damaging voltage spikes.

### Evolution™ Controls
- **Auto/Manual/Off illuminated buttons**
  - Selects the operating mode and provides easy, at-a-glance status indication in any condition.
- **Sealed, raised buttons**
  - Smooth, weather-resistant user interface for programming and operations.
- **Utility voltage sensing**
  - Constantly monitors utility voltage, setpoints 60% dropout, 80% pick-up, of standard voltage.
- **Utility interrupt delay**
  - Prevents nuisance start-ups of the engine, adjustable 2-1500 seconds from the factory default setting of 5 seconds by a qualified dealer.
- **Engine warm-up**
  - Ensures engine is ready to assume the load, setpoint approximately 5 seconds.
- **Engine cool-down**
  - Allows engine to cool prior to shutdown, setpoint approximately 1 minute.
- **Programmable seven day exerciser**
  - Operates engine to prevent oil seal drying and damage between power outages by running the generator for 12 minutes every week.
- **Smart battery charger**
  - Delivers charge to the battery only when needed at varying rates depending on outdoor air temperature.
- **Main line circuit breaker**
  - Protects generator from overload.
- **Electronic governor**
  - Maintains constant 50 Hz frequency.

### Unit
- **SAE weather protective enclosure**
  - Sound attenuated enclosure ensures quiet operation and protection against mother nature, withstanding winds up to 150mph. Hinged key locking roof panel for security. Lift-out front for easy access to all routine maintenance items. Electrostatically applied textured epoxy paint for added durability.
- **Enclosed critical grade muffler**
  - Quiet, critical grade muffler is mounted inside the unit to prevent injuries.
- **Small, compact, attractive**
  - Makes for an easy, eye appealing installation.

### Installation System
- **1 ft (305 mm) flexible fuel line connector**
  - Easy installation.

## Engine

- **Type of Engine**: GENERAC OHVI V-TWIN
- **Number of Cylinders**: 2
- **Displacement**: 590 cc
- **Cylinder Block**: Aluminum w/ Cast Iron Sleeve
- **Valve Arrangement**: Overhead Valve
- **Ignition System**: Solid-state w/ Magneto
- **Governor**: Electronic
- **Compression Ratio**: 9.5:1
- **Starter**: 12 Vdc
- **Oil Capacity Including Filter**: 1.7 qt/1.6 L
- **Operating rpm**: 3,000
- **Fuel Consumption**
  - Natural Gas: 0.002 ft³/hr (m³/hr)
  - Liquid Propane: 0.008 ft³/hr (gal/hr) (l/hr)

**Note**: Fuel pipe must be sized for full load. Required fuel pressure to generator fuel inlet at all load ranges - 3.5-7" water column (7-13 mm mercury) for natural gas, 10-12" water column (25-30 mm mercury) for LP gas.

## Controls

- **2-Line Plain Text Multilingual LCD Display**
- **Mode Buttons**: Auto
  - **Auto**: Automatic Start on Utility failure. 7 day exercise.
  - **Manual**: Start with starter control, unit stays on. If utility fails, transfer to load takes place. Stops unit. Power is removed. Control and charger still operate.
- **Ready to Run/Maintenance Messages**: Standard
- **Engine Run Hours Indication**: Standard
- **Programmable start delay between 2-1500 seconds**: Standard
- **Utility Voltage Loss/Return to Utility Adjustable**: From 140-156 V/175-198 V
- **Future Set Capable Exercise/Exercise Set Error Warning**: Standard
- **Run/Alarm/Maintenance Logs**: 50 Events Each
- **Engine Start Sequence**: Cyclic cranking; 16 sec on, 7 rest (90 sec maximum duration).
- **Starter Lock-out**: Starter cannot re-engage until 5 sec after engine has stopped.
- **Smart Battery Charger**: Standard
- **Charger Fault/Misrating AC Warning**: Standard
- **Low Battery/Battery Problem Protection and Battery Condition Indication**: Standard
- **Automatic Voltage Regulation with Over and Under Voltage Protection**: Standard
- **Under-Frequency/Overload/Stepdown Overcurrent Protection**: Standard
- **Safety Fused/Fuse Problem Protection**: Standard
- **Automatic Low Oil Pressure/High Oil Temperature Shutdown**: Standard
- **Overcrank/Overload/rpm Sense Load Shutdown**: Standard
- **High Engine Temperature Shutdown**: Standard
- **Internal Fault/Incendive Wiring Protection**: Standard
- **Common External Fault Capability**: Standard
- **Field Upgradable Firmware**: Standard

**Note**: Sound levels are taken from the front of the generator. Sound levels taken from other sides of the generator may be higher depending on installation parameters. Rating definitions - Standby: Applicable for supplying emergency power for the duration of the utility power outage. No overload capability is available for this rating. (All ratings in accordance with BSS5514, IS03046, DINE271 and AS/NZS CISP 12:2005.) **Maximum wattage and current are subject to and limited by such factors as fuel BTU content, ambient temperature, altitude, engine power and condition, etc. Maximum power decreases about 3.5 percent for each 1,000 (304.8 meters) feet above sea level; and also will decrease about 1 percent for each 6 °C (10 °F) above 16 °C (60 °F).**
**Model #** | **Product** | **Description**
--- | --- | ---
006212-0 | Cold Weather Kit | If the temperature regularly falls below 32 °F (0 °C), install a cold weather kit to maintain optimal battery and oil temperatures. Kit consists of a battery warmer and oil filter heater with built-in thermostats.
005839-0 | Fascia Base Wrap Kit | The fascia base wrap snaps together around the bottom the new air-cooled generators. This offers a sleek, contoured appearance as well as offering protection from rodents and insects by covering the lifting holes located in the base.
005703-0 | Paint Kit | If the generator enclosure is scratched or damaged, it is important to touch-up the paint to protect from future corrosion. The paint kit includes the necessary paint to properly maintain or touch-up a generator enclosure.
006483-0 | Scheduled Maintenance Kit | Generac's scheduled maintenance kits provide all the hardware necessary to perform complete routine maintenance on a Generac automatic standby generator.
006484-0 | | |
